

## Online Safety

***Protect your accounts with 2-step verification.***

2-step verification is also known as 2-factor authentication. This simple additional measure can make all the difference. When you're logging in to an e-commerce site like Amazon, set up a 2-step verification process.

2-step verification means that after you have entered your username or email address and password, you will receive a text or call containing a passcode to your mobile phone. You will then need that passcode to enter your account.

If you suddenly receive a passcode when you are not trying to log in – you'll know someone else is trying to gain access to your account using your details. If this happens, change your password immediately.

## School Council

The School Council was invited to open the new Co-op on Wigan Road. We are very honoured to have been asked and the children did us proud.

***We are here for you in school if you need anything.  
Please phone us even if it is just for a friendly chat.***
