

Year 3 Topic Homework Summer 2

GO THERE!

Our topic will be based on our local area.

Go out and about!

What is your favourite part of our local area?
Ask your family their favourite aspects.

How many different types of buildings is Leyland made up of?

RESEARCH IT

Leyland as a town - it is traced all the way back to King Edward 'The Confessor' in 1066!

What can you find out about the town's extensive history?
How have things changed?

MAKE IT, PLAY IT, LEARN IT!

There are 48 counties in England, which is a lot to remember! Using a picture like the one below, cut along the county lines to make each county into a jigsaw piece!

Who can put England back together the fastest?

DESIGN IT

We will be thinking about how towns are constructed and the processes involved.

Get creative and design your own town! It can be as imaginative as you want, but remember what the people living there will need to survive.

FIND IT

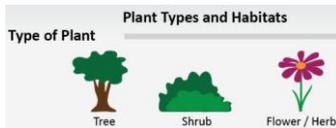

Plant Collector

When you're out and about, see how many different types of plants you see.

Can you sort them into different categories?

Do you notice that plants you find in certain places seem to be similar?

When we learn the plant types, can you work out what type of plant you have found?

TRY IT

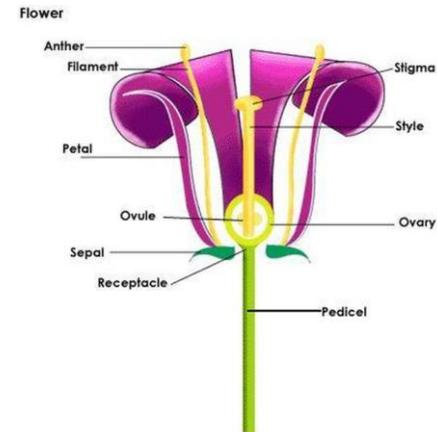

Plant Parts

Flowers are made up of lots of different parts, like your body is!

Get a flower (with permission) and dissect it - take it apart carefully.

How many different parts can you find?

What do the different parts do?

MAKE IT

Bottle Terrarium

Make a habitat for plants out of an old pop bottle!

You will need:

- 2L plastic bottle
- Scissors
- Seeds or plant cuttings
- Potting soil
- Charcoal (crushed)

Step 1: Remove the black plastic base from the bottom of your soda bottle and set it aside.

Step 2: Use scissors to cut off the top of the bottle, just below the "shoulder" of the bottle. When turned over, the bottle forms a clear dome over your terrarium.

Step 3: Sprinkle about 1/2 inch of crushed charcoal in the bottom of the black plastic base.

Step 4: Fill the base with potting soil up to about 1/2 inch from the top.

Step 5: Plant your seeds/ cuttings

Step 6: Water them until the soil is moist but not soggy.

Step 7: Cover the plants with the clear plastic dome you made from the rest of the bottle.

Step 8: Place your bottle terrarium in a sunny spot and water it regularly
