

Your child can have fun competing against other children in their class and from all over the world, trying to get on the high score board! They are not able to communicate in anyway with others – it is a totally safe learning environment.

The teacher will set your child **ONE maths task** (10 questions) to complete each week – they will go this area to do this. Once a child has completed this task, they are free to log off or use other fetaures of Mathletics.

If your child is struggling with a question, they can click on the question icon and watch a tutorial – this will also help parents explain to their child/ren how to do things.

Put the numbers in order from least to greatest.

Children can also hover over and click text to listen to it if they are struggling to read it.

If your child gets questions wrong, the program autmatically adjusts to their ability. Your child can also choose the ‘something easier’ and ‘something harder’ options. The teacher will be able to see children’s results and whether they need help. As a parent, you can also sign up for free to see how your child is doing by going to: [www.mathletics.co.uk/parents](http://www.mathletics.co.uk/parents)

The Problem Solving activities are a wide range of tasks that present mathematical-based problems in a real-life context. In this area, your child can use the number skills they have developed to solve a range of problems in an exciting game-based environment.

Two maths dictionaries so children and parents alike can look up terms they may have forgotten!

Rainforest Maths is a separate area within Mathletics. These activities are designed for students up to year 6 and have a great rainforest theme. This is where your child can practise their **times-table** of the week.

Meet Max the Cat and his band in the Times Tables Tunes. They have created 11 great music videos to help you master multiplication. From the Disco Strut to the Jungle Boogie, these songs are a great way to learn **times-tables!**

# Spellodrome

Your child can access Spellodrome via a link in Mathletics.

The teacher will set **ONE** word list for your child/ren to practise each week. They can see the words in this area and practise reading them, listening to them in sentences and typing them from memory.

Here, children can choose to play games based on their weekly word list, e.g. unscrambling anagrams and word jigsaws.

Here, your child can compete against children all over the world, trying to spell words correctly.

If your child likes to write, they can choose to access examples of different genres here and then make their own.

Your child is going to be introduced to Mathletics and Spellodrome before the holidays and will bring home their login details. If they wish to sign in over the holidays, they are very welcome to.

Next half-term, we will provide a session for parents to show and explain the features of Mathletics. In the meantime, we hope this guide is useful and do not hesitate to get in touch if you have any questions.
